

Size Reduction Equipment Supplier Members

Kenburn Carpet Crusher

Suppliers of waste compaction machinery for new and post-consumer carpet waste.

The ideal solution to reduce the volume of material generated is to compact it using a Kenburn carpet crusher.

Purchasing or renting a carpet crusher will optimise transport costs in sending materials to recyclers reducing transportation costs by 75%.

As well as compacting carpet and underlay, waste carpet crushers can also be used to compact cardboard and plastic wrapping waste.

Kenburn can visit your site anywhere in the UK and advise on the environmental and financial benefits of installing a carpet crusher.

To arrange a free of charge no obligation waste survey please contact Kenburn on 01727 844988.

MachTech Services Ltd

MachTech Services is a specialist engineering company working exclusively with Industrial Shredding Machinery.

Based in the Northwest, we are in prime position for all the major motorway networks which allows us to provide an unparalleled service back up to the recycling industry.

The experience of our service engineering teams on all makes, models and types of Industrial Shredders has led to us to being the suppliers of choice for many of the biggest players in today's recycling marketplace. A wide customer base ranging from owner operators to some of Britain's premier blue-chip companies has ensured that the MachTech Services name has become synonymous with Responsibility, Quality and Reliability.

Our Products

In the field of carpet processing MachTech/Lindner are happy to offer primary and secondary shredders along with conveyors all from one manufacturer and all of the same proven high quality.
