

Members:

MachTech Services Ltd is a specialist engineering company working exclusively with Industrial Shredding Machinery.

Based in the Northwest, we are in prime position for all the major motorway networks which allows us to provide an unparalleled service back up to the recycling industry.

The experience of our service engineering teams on all makes, models and types of Industrial Shredders has led to us to being the suppliers of choice for many of the biggest players in today's recycling marketplace. A wide customer base ranging from owner operators to some of Britain's premier blue chip companies has ensured that the MachTech Services name has become synonymous with Responsibility, Quality and Reliability.

In the field of carpet processing MachTech/Lindner are happy to offer primary and secondary shredders along with conveyors all from one manufacturer and all of the same proven high quality.

Sagitto Ltd is an international supplier of miniature hand-held near-infrared spectrometers which are the size of the palm of your hand, light weight and battery powered. These are used for testing the composition of materials including fibre composition of carpets and textile flooring.

This is a simple and accurate method to determine the composition of carpets which takes just a few seconds.
